

A woman with long brown hair, wearing a white long-sleeved shirt and blue jeans, is sitting on the ground with her head buried in her hands, looking distressed. She is surrounded by cracked, dry earth. In the background, there is a bare, leafless tree against a pale, hazy sky.

VAGINAL HYAL GEL EFFECTIVE IN TREATMENT OF DYSPAREUNIA IN WOMEN USING HORMONAL CONTRACEPTIVE⁴

COC: Hormonal oral contraceptive; VAS: visual analogic scale; FSFI: Female Sexual Function Index; VM: vaginal maturation index. Consecutive sexually active women using COC and complaining of de novo dyspareunia were enrolled in the study. Two attending physicians were involved in the study: (Group 1) prescribed a 12-week vaginal estrogenic therapy with estriol 50 mg/g gel twice a week vs (Group 2) Hyaluronic acid vaginal gel therapy once a day. The dyspareunia levels evaluated using visual analogic scale (VAS) and sexual function using Female Sexual Function Index (FSFI). Vaginal atrophy was graded per the vaginal maturation index (VM).⁴

- Vaginal Hyal Gel provides excellent benefit. It is proven to be as effective as estriol gel in the treatment of dyspareunia among woman using COC besides improving sexuality.⁴
- Vaginal Hyal Gel is a safer alternative compared to estrogen based treatments in relieving the symptoms of vaginal dryness.⁴
